**Terminology :** The terminology used for describing motion pictures varies considerably between British and American English. In British usage, the name of the medium is film. The word movie is understood but seldom used.<sup>78</sup> Additionally, the pictures plural is used semi-frequently to refer to the place where movies are exhibited, while in American English this may be called the movies, but it is becoming outdated. In other countries, the place where movies are exhibited may be called a cinema or movie theatre. By contrast, in the United States, movie is the predominant form. Although the words film and movie are sometimes used interchangeably, film is more often used when considering artistic, theoretical, or technical aspects. The term movies more often refers to entertainment or commercial aspects, as where to go for fun evening on a date. For example, a book titled *How to Understand a Film* would probably be about the aesthetics or theory of film, while a book entitled *Lets Go to the movies* would probably be about the history of entertaining movies and blockbusters.

Any film may also have a sequel, which portrays events following those in the film. *Bride of Frankenstein* is an early example. When there are more films than one with the same characters, story arcs, or subject themes, these movies become a series, such as the James Bond series. And, existing outside a specific story timeline usually, does not exclude a film from being part of a series. A film that portrays events occurring earlier in a timeline with those in another film, but is released after that film, is sometimes called a prequel, an example being *Butch and Sundance: The Early Days*.

**Production** Main article: Filmmaking At its core, the means to produce a film depend on the content the filmmaker wishes to show, and the apparatus for displaying it: the zoetrope merely requires a series of images on a strip of paper. Film production can, therefore, take as little as one person with a camera or even without a camera, as in Stan Brakhage's 1963

film *Mothlight*, or thousands of actors, extras, and crew members for a live-action, feature-length epic. The necessary steps for almost any film can be boiled down to conception, planning, execution, revision, and distribution. The more involved the production, the more significant each of the steps becomes. In a typical production cycle of a Hollywood-style film, these main stages are defined as development, pre-production, production, post-production and distribution. This production cycle usually takes three years. The first year is taken up with development. The second year comprises preproduction and production. The third year, post-production and distribution. The bigger the production, the more resources it takes, and the more important financing becomes most feature films are artistic works from the creators perspective e.g., film director, cinematographer, screenwriter and for-profit business entities for the production companies.
